ZimRelief is an aid organization supporting social projects in the southern African country of Zimbabwe.

We have made it our objective to inform others about the situation in Zimbabwe and to offer sustainable support to the local population.

In order to reach that goal, we support carefully selected independent local initiatives which are selected and checked personally. Our partner organizations consist mainly of educational projects aimed at enabling participating students to discover and develop skills that will allow them to lead free and independent lives.

We help our partners on eye-level ("Helfen auf Augenhöhe") and exclusively support projects founded and managed by locals. We are convinced that sustainable development cannot work from the outside. Instead it must grow from the centre of every society.

ZimRelief is an exclusively volunteer-based organization. All donations we receive go, in their entirety, to our partner projects.
